Product price:

€749.00

Reference: KITBXWALLPOLNWT2PR3F
EAN13: 8427542126050

The Policharger NW-T2 three-phase 22 kW car charger features an intuitive installation and use to optimise the charging of the electric vehicle. The power adjustment is done automatically. It has been designed to adapt to the charging needs of any vehicle, making the most of the power available in the installation. It stands out for its durability and optimum operation both indoors and outdoors.

Includes 5m three-phase Mode 3 charging cable with Type 2 connector and the necessary protections according to ITC-BT52 (differential switch, circuit breaker and surge protection), with the optional addition of an automatic reset system and DC leakage protection.
