Charge your electric vehicle quickly and comfortably thanks to the Policharger IN charger. Its powerful single-phase charging system of up to 7,4 kW will allow you to charge your electric vehicle in a simple way. It incorporates a 7-meter type 2 hose. It has a versatile and resistant design that ensures great durability, and its LCD display makes it intuitive and easy to use. In addition, it features dynamic charge regulation sensors, which allow you to charge your electric vehicle in an optimized way by adjusting the charging power to the total power available in your home's electrical installation.
