7,4 kW, 5 m T2 hoses, Dynamic charge
regulation

Product price:

€849.00

Reference: OPNWDB5M1F

EAN13: 8437024504269

Charge two electric vehicles at once quickly and comfortably thanks to the Policharger NW charger. Its powerful single-phase charging system of up to 7,4 kW will allow you to charge your electric vehicles in a simple way. It incorporates two 5-meter hoses with type 2 connector. It has a versatile and resistant design that ensures great durability, and its LCD display makes it intuitive and easy to use. In addition, it features dynamic charge regulation sensors, which allow you to charge your electric vehicles in an optimized way by adjusting the charging power to the total power available in your home's electrical installation.
