

Policharger NW-DBLT23F electric vehicle charger, 22 kW, 5 m T2 hoses, Dynamic charge regulation

Product price:

€849.00

Reference: OPNWDB5M3F

EAN13: 8437024504283

Charge two electric vehicles at once quickly and comfortably thanks to the Policharger NW charger. Its powerful three-phase charging system of up to 22 kW will allow you to charge your electric vehicles at full speed. It incorporates two 5-meter hoses with type 2 connector. It has a versatile and resistant design that ensures great durability, and its LCD display makes it intuitive and easy to use. In addition, it features dynamic charge regulation sensors, which allow you to charge your electric vehicles in an optimized way by adjusting the charging power to the total power available in your home's electrical installation.
