

Policharger NW-T23F electric vehicle charger, 22 kW, 5 m T2 hose, Dynamic charge regulation

Product price:

€549.00

Reference: OPNWT23F

EAN13: 8437024504221

Charge your electric vehicle quickly and comfortably thanks to the Policharger NW charger. Its powerful three-phase charging system of up to 22 kW will allow you to charge your electric vehicles at full speed. It incorporates a 5-meter hose with a type 2 connector. It has a versatile and resistant design that ensures great durability, and its LCD display makes it intuitive and easy to use. In addition, it features dynamic charge regulation sensors, which allow you to charge your electric vehicle in an optimized way by adjusting the charging power to the total power available in your home's electrical installation.
